Mission

Through our innovative solutions we help and energise special needs people the world over.

Vision

To transform the lives of special needs people by being trustworthy, engaging their challenges, developing the best solutions, and constructing for reliability and quality.

We seek constant improvement, and value broad perspectives; we encourage self-development, and applaud all who influence our company for the better.

Company Overview

NOEL s.c. is a design and manufacturing company with 15 years experience in the production of rehabilitation equipment to improve the daily life and increase the comfort of disabled people.

Between 2001 and 2007 our core products were wooden Prone Standers and Rehabilitation Chairs. Nowadays, NOEL's core product brand is STABILO, the series of vacuum posture cushions and mattresses.

Since the 2007 introduction to the Polish market our company has sold more than 8,000 STABILO cushions. STABILO cushions are in daily use in hospitals, rehabilitation centres, daily care centres, and private homes. And, even Event companies use STABILO cushions while organising survival trips.

NOEL products are currently distributed in 18 countries across Europe, Latin America and Africa. Our company is always seeking new distributors and retailers and new applications for our solutions.

Product description: STABILO cushions

Use of flexible materials combined with the principle of vacuum enables unlimited form modelling and hardening of each cushion or mattress according to the specific needs of each individual. The shape and hardness of STABILO cushions can be changed several times in a very simple way. Cushions from this product line are durable, and easily cleaned in a standard washing machine. STABILO vacuum solutions stabilise patient's bodies, especially those with cerebral palsy, spina bifida, scoliosis, pelvic deformities, etc.

STABILO cushions have applications in use as a seat, backrest, headrest, armrest, wheelchair insert, car seat, universal chair, or deck chair. The cushion has provision to mould a wedge for leg abduction, and includes a headrest for better head control. When formed, each cushion fits closely and evenly, supporting deformed body parts. Side pelots or mouldable sidewalls ensure sideways stabilisation of the body's trunk. STABILO is also in use as a comfortable waterproof deckchair, which is helpful during bathing.

STABILO solutions facilitate everyday life for people with special needs.
